\*This Quarterly Consolidated Financial Results report is not subject to quarterly review by certified public accountants or an auditing firm.

\*Explanation of appropriate use of earnings forecast, and other special notes

The forecast and other future projections in this report are based on information currently available to the Company and certain assumptions the Company believes to be reasonable, and are not intended to be a promise by the Company that they will be achieved. Actual results may differ significantly due to various factors. Refer to "1. Qualitative information on quarterly financial results, (3) Explanation of forecast of consolidated operating results and other future projections" on page 3 of the attachment for the assumptions used in earnings forecast and notes on the use of earnings forecast.

The Company plans to hold a financial results briefing because we believe it is important to disclose information about the Company to the financial markets in a timely and appropriate manner. However, the event will be live-streamed to avoid the COVID-19 infections, as the health and safety of all participants is our first priority. The live-streamed briefing will be available on the Company's website at a later date.

### 1. Qualitative information on quarterly financial results

### (1) Explanation of operating results

During the six months ended September 30, 2022, the Japanese economy showed signs of gradual recovery as people grew accustomed to the "life with COVID-19," although the impacts from the new coronavirus infection still remained. However, there is a risk that the momentum of economic recovery may be lost due to spikes in resources prices induced by the tense situations in Ukraine and rising prices driven by a cheaper yen. As such, the future of the Japanese economy still remains uncertain.

In terms of the business environment for the DKK Group, demand is on a gradual recovery as that from capital spending in the automotive-related industry has recovered slowly. However, corporate earnings have been affected by such factors as spikes in prices of energy, components, etc. and higher costs of procurement from overseas due to a weaker yen, in addition to continuous impacts of semiconductor shortage, restrained customer investments, and the delay in components being delivered caused mainly by a longer time it now takes for orders for them to be fulfilled.

In such circumstances the Group posted orders received of 19.47 billion yen, up 9.7% from a year earlier, and net sales of 13.185 billion yen, down 11.3% year on year, for the six months ended September 30, 2022.

As for profits, the Group posted operating loss of 1.192 billion yen (compared to operating loss of 281 million yen for the year-earlier period), ordinary loss of 906 million yen (compared to ordinary loss of 181 million yen for the year-earlier period), and net loss attributable to shareholders of parent company of 637 million yen (compared to net income attributable to shareholders of parent company of 18 million yen for the year-earlier period).

Results by segment are as follows. (Results of reportable segments, etc. include intersegment sales, etc.)

### (a) Telecommunication Business

In the mobile communications-related field, while our customers revised their investment plans, we felt the impact of higher prices of components and rises in procurement costs due to a weaker yen. In the fixed wireless communication-related field, construction schedules have been delayed due to intensified competition fueled by biddings, higher outsourcing costs, and longer lead time for orders for components, etc. Still, deals postponed due to the COVID-19 pandemic are coming back on. In the broadcasting-related field, demand was expected to increase driven by moves to update digital broadcasting equipment, but such demand, as well as demand from maintenance needs, have been postponed. In the solutions-related field, which has been designated as a growth field, we have been working to generate demand in the network-related markets, mainly for the local 5G business. We have won orders for the Ministry of Internal Affairs and Communications' development and testing project, for example. We are also working to strengthen collaboration with partner companies.

This segment has been facing a tough situation, affected by not only restrained spending by customers but also higher procurement costs and delivery delays, etc. caused by longer lead time for orders for components, etc. In such an environment, we continued to work to generate demand and improve productivity in this segment, but posted orders received totaling 13.816 billion yen, up 0.2% year on year, and net sales of 9.150 billion yen, down 15.3% year on year. Segment loss (operating loss) came to 387 million yen (compared to segment income of 697 million yen in the year-earlier period).

### (b) Radio Frequency Business

For the mainstay induction heating equipment-related field, demand from capital spending in the automotive-related industry is on a recovery track and orders received have remained solid. However, longer lead time for orders for components, etc. and a spike in prices of energy, components, etc. have had an impact on the field. The contract heat treating service-related field has faced demand decreases due to production adjustment moves mainly in Japan by automakers, and cost-increasing factors, including a spike in power bills, still remain. In the new radio frequency areas-related field, which has been designated as a growth field, we have been doing sales activities aggressively, targeting mainly the industrial waste processing and food industries. In some areas, we have also launched a trial operation using actual equipment. In such an environment, we have worked in this business to capture demand and improve productivity according to the business environment.

As a result, orders received increased 42.5% year on year to 5.654 billion yen, while net sales decreased 0.8% year on year to 3.994 billion yen. Segment income (operating income) increased 7.5% year on year to 582 million yen.

### (2) Explanation of financial position

Total assets totaled 56.040 billion yen as of September 30, 2022, down 296 million yen from the end of the previous fiscal year. Current assets decreased 843 million yen from the end of the previous fiscal year to 40.145 billion yen. The main factors were decreases of 2.3 billion yen in trade receivables including notes receivable-trade and 1.773 billion yen in deposits paid included in "Other Businesses," despite increases of 3.042 billion yen in cash and deposits and 395 million yen in inventories. Non-current assets increased 547 million yen from the end of the previous fiscal year to 15.895 billion yen. The main factors were increases of 184 million yen in investment securities and 312 million yen in deferred tax assets.

Current liabilities increased 1.543 billion yen from the end of the previous fiscal year to 7.873 billion yen. The main factors were an increase of 2.170 billion yen in short-term loans payable, despite a decrease of 759 million yen in trade payables including notes payable-trade.

Fixed liabilities increased by 1.027 billion yen from the end of the previous fiscal year to 4.425 billion yen. The main factor was an increase of 1.019 billion yen in long-term loans payable.

Net assets decreased 2.867 billion yen from the end of the previous fiscal year to 43.741 billion yen. The main factors were decreases of 1.341 billion yen in retained earnings and 1.767 billion yen in treasury stock as a result of acquisition, etc.

### (3) Explanation of forecast of consolidated operating results and other future projections

As a result of reviewing earnings forecasts to reflect recent earnings trends, etc., we revised the forecast of the consolidated operating results for the fiscal year ending March 31, 2023 announced in "Consolidated Financial Results for the Three Months Ended June 30, 2022" dated August 9, 2022.

(3) Notes to quarterly consolidated financial statements

(Notes on going concern assumptions)

There are no matters to be noted.

(Notes in case of significant changes in shareholders' equity)

There are no matters to be noted.

# (Changes in accounting policies)

(Application of Accounting Standard for Fair Value Measurement, etc.)

The Company began applying the "Revised Implementation Guidance on Accounting Standard for Fair Value Measurement" (Revised ASBJ Guidance No. 31 released June 17, 2021; the "Guidance" hereafter) at the beginning of the three months ended June 30, 2022 and decided to continue to apply the new accounting policies prescribed in the Guidance in accordance with the transitional procedures stipulated in Paragraph 27-2 of the Guidance. There is no impact on the quarterly consolidated financial statements.

### (Additional information)

(Impacts of COVID-19 pandemic on accounting estimates)

The impact of the spread of COVID-19 on the Group has been easing but still remains. The industry the Group is involved in also experienced some impacts on sales activities. Although it is difficult to predict how COVID-19 will spread and when it will be contained, we assume based on information from internal and external sources that this trend will continue for a certain period of time, and have made accounting estimates for impairment losses on non-current assets and the recoverability of deferred tax assets, etc. We note that if COVID-19 pandemic further spreads or remains for longer, it may affect the Group's earnings and financial position.

(Notes) 1 The "Other Businesses" segment, which is not included in reportable segments, includes equipment leasing and electric power sales businesses.

2 The segment income (loss) adjustment of (1,465) million yen includes elimination of intersegment transactions of (42) million yen and corporate expenses of (1,422) million yen that are not allocated to any reportable segment. Corporate expenses are mainly general and administrative expenses that are not attributable to any reportable segments.

3 Adjustments are made to reconcile segment income (loss) with operating loss in the quarterly consolidated statement of income.

# (Material subsequent events)

## (Cancellation of treasury stock)

Cancellation of treasury stock was resolved at the Company's Board of Directors' Meeting on November 11, 2022 in accordance with Article 178 of the Companies Act.

(1) Reason of cancellation

In order to enhance shareholder returns in accordance with the policy on acquisition and cancellation of treasury stock, which was disclosed on February 10, 2022.

- (2) Details of shares to be cancelled
  - (a) Type of shares to be cancelled: Common stock of the Company
  - (b) Total number of shares to be cancelled: 1,984,845
    - (Ratio to the pre-cancellation total number of shares issued (excluding treasury stock): 18.31%)
  - (c) Effective date: November 30, 2022

(Reference) Post-cancellation total number of shares issued: 12,100,000

# 3. Supplementary information

(1) Production, orders and sales

# (a) Production results

Production results by reportable segment for the six months ended September 30, 2022 are shown below.

| Reportable segment         | Output (millions of yen) | Year-on-year change (%) |
|----------------------------|--------------------------|-------------------------|
| Telecommunication Business | 5,559                    | 0.9                     |
| Radio Frequency Business   | 4,304                    | 6.9                     |
| Total                      | 9,863                    | 3.5                     |

(Notes) 1 Amounts are based on sales prices, and intersegment transactions have been offset.

2 In the Telecommunication Business, production results related to construction projects are excluded from the above production results due to difficulty in defining the results.

# (b) Results of orders received

Results of orders received by reportable segment for the six months ended September 30, 2022 are shown below.
